**Assessment Report Form
Edison State College**

1. Assessment Project Report:

Program	MAT 1033
Department	Math Department
College	Arts and Sciences
Program Assessment Coordinator	Professor James Ward
Academic Year	2008 - 2009
Report Submitted by	Professor James Ward
Phone/email	jward@edison.edu
Date Submitted	March 14, 2010

2. According to the Assessment Plan, what were the planned assessment activities to be conducted during the Academic Year? You may want to copy and paste from this program's assessment plan.

Which outcomes for this program were measured?	How did you measure the outcomes?	What results did you expect?
Common Course Objectives for MAT 1033	Pre and post tests	We expected the students to show significant improvement in the post test.

3. Results, conclusions, and discoveries. What are the results of the planned activities listed above? What conclusions or discoveries were made from these results. Describe below or attach to the form.

Scores improved in all of the embedded questions in the post test, except for one. The scoring team decided to add more questions in the post tests for MAT 1033; then, the math department would have more statistical data to assist with curriculum adjustment.

4. Use of Results. What program changes are indicated? How will they be implemented? If none, describe why changes were not needed.

At this point, the math department decided to work more closely with SOAR and Developmental Learning to identify high-risk MAT 1033 students.

5. Dissemination of results, conclusions, and discoveries. How and with whom were the results shared?

This information will be shared with the math faculty during departmental meetings and posted to the Assessment Website.
