

**2013-2014 Biennial Colloquium  
“The Price and Promise of Progress”**

**P r e s e n t s**

# **EATING TO THRIVE**

During the last century, technological developments have profoundly affected our dietary habits and food production systems. While the average American diet is known to cause an array of chronic and fatal diseases, individuals find it difficult to regain control over their food choices.

*Could an understanding of additional problems brought about by the industrial food complex –from social injustice to environmental degradation and animal abuse– help us tip the scale in favor of a healthy diet and a healthy planet?*

**When: Tuesday April 1<sup>st</sup>, 2014 – 5:00 to 8:30 pm**

**Where: Edison State College, Lee Campus  
U-Building, Room 102  
8099 College Parkway, Fort Myers, FL 33919**

## **Schedule of Events**
