Class “C” Wastewater Operators Training - Certificate Program

This course prepares the student for the Class “C” Wastewater License State Exam, as well as, provides the student with the practical skills necessary to safely operate and maintain various wastewater treatment systems and appurtenances. Topics to be covered include operational problem solving, plant safety and maintenance. Additional topics covered include operational procedures and mathematical calculations relating to wastewater treatment process control. Successful completion of this course: requires a grade of “C” or better as evidenced by the final exam; culminates in the receipt of a certificate of completion; and satisfies the Florida Department of Environmental Protection’s course prerequisite for taking the State Wastewater Class “C” Exam. The course is a combination of lecture, demonstrations, and plant visits.

General Course Details:

- Plant Operations
- Types of Wastewater Treatment
- Pre-treatment
- Solids Disposal and Handling
- Chlorination
