

## Classification Description

---

**Job Title:** Application Development Specialist III

**Pay Grade:** TB050

**Job Code:** T021

**FLSA Status:** Exempt

### **Job Purpose**

This position is a senior level role that encompasses advanced application development, technical leadership and support to all areas of the College. The Application Development Specialist III requires in-depth knowledge of application development principles and practices, along with the ability to drive innovation and guide the development work. Work includes gathering complex application development requirements from customers and translating those requirements into the programming needed to produce software applications and integrations. This position is also responsible for designing, developing automating systems processes, and oversight to support effective and efficient operations using innovative and emerging technologies.

Responsibilities include, but are not limited to, lead in the design and implementation of application development, programming, administration, primary support, maintenance, security and implementation for third-party applications that are integrated into the College's ERP system, as well as stand-alone applications. Systems include, but are not limited to, Banner, Portal, Workflow, Xtender, Evisions, and Canvas.

### **General Responsibilities**

#### **Essential Functions**

Leads in the design and development of assigned applications for the College which includes new enhancement identification, development and implementation, troubleshooting system and operation problems, coordination of solutions with all users and Information Technology.

Identifies, develops, and implements complex enhancements and integrations related to third-party applications; coordinates solutions with end users and administers the applications.

Stays updated with emerging technologies and industry best practices to drive innovation and application development.

Develops, programs, supports, and maintains the integrations with the College's ERP system (Banner).

Leads projects for Information Technology including identifying needed revisions to the system integrations, Banner workflow and process improvements, and other data and information needs.

## APPLICATION DEVELOPMENT SPECIALIST III

Designs and develops project plans leading and facilitating implementation; identifies solutions to problems and facilitates resolutions.

Provides guidance to the Applications Development Specialist team.

Identifies, develops, and implements workflows for the College; troubleshoots user errors in Workflow; creates complex workflow components and models.

Assists in the development and testing of integration components to Banner/Oracle database.

Develops and maintains Enterprise Systems documentation.

With the functional administrators, establishes and maintains user profiles and security for the College's third party applications. Grants and tracks access in support of, and at the direction of, the functional/IT area administrators.

Schedules, coordinates, reviews, and applies product upgrades and enhancements and advises users of impact.

Designs, analyzes, codes, documents, and implements applications that support, enhance and integrate with the College-wide enterprise application suite.

Serves as the liaison between the functional area and Information Technology in developing new information initiatives and maintaining/troubleshooting current systems and applications.

Creates and maintains custom scripts for the College LMS. This includes developing, testing, documenting, and maintaining scripts used in the College LMS.

Performs other duties as assigned.

These essential job functions are not to be construed as a complete statement of all duties performed; employees will be required to perform other job related duties as required. An employee with a disability is encouraged to contact the Human Resources Office to evaluate the job in greater detail in order to determine if she/he can perform the essential functions of this job with or without reasonable accommodation.

### **Knowledge, Skills and Abilities**

#### **Minimum Qualifications**

Bachelor's degree from a regionally accredited institution of higher education in Information Technology, Computer Science, Information Systems, or related field.

Five (5) years of related full-time professional work experience. Appropriate combination of education and experience may be substituted.

Demonstrated experience using a personal computer, office software such as MS Office and electronic mail.
