DEDICATE To GRADUATE

Last month, we asked you to think about your academic and career goals. Thanks to all students who completed the career assessment and shared their educational and career goals. Your stories are inspiring! Alyssa Bell's story is featured below.

Alyssa is studying computer programming; she loves coding, challenging herself, and thinking in new ways.

Programming is universal, every career field needs programmers and web developers. Alyssa states, "I can take these skills anywhere I go, including other coexisting passions such as music. I want to create music plugin software for electronic music. Plugins that create, manipulate, and customize brand new sounds. That are easy on the computer's CPU and work seamlessly with any digital audio workstation.

Alyssa plans to become an entrepreneur and wants to inspire other females to enter the field of computer science. Alyssa notes that "males dominate computer science. Only 20% of females account for all computer science majors, and I want to change that statistic."

FSW has numerous resources to help you succeed!

Did You Know?

This fall Peer Tutors provided free tutoring support for over 56 different classes taught at FSW.

Students can access essential resources such as food, kitchen staples, and personal care items free of charge through the FSW food pantry located at every FSW service location.

Over 4,700 students spent 21,500 hours in FSW's Academic Support Centers.
