with #'s

non-numeric
without #'s

Solving Numeric Problems

Estimate Walking Time

You are visiting Indianapolis. You decide to walk from the Indiana State Capital to the Murat Centre for an afternoon performance.

According to the map, the shortest route from the capital to the theater is **8 blocks**.

➤ How many minutes will the trip take if you can walk 1 mile in 20 minutes?

Assume that 10 blocks equals 1 mile.

1 Analyze List the knowns and the unknown.

KNOWNNS

distance to be traveled = 8 blocks
walking speed = 1 mile / 20 min
1 mile = 10 Blocks

UNKNOWN

How long is the trip?

2 Calculate Solve for the unknown.

$$10 \text{ block} = 1 \text{ mi.}$$

$$20 \text{ min} = 1 \text{ mi}$$

$$\frac{20}{10} = 2 \text{ min per block}$$

$$8 \text{ blocks} = ? \text{ min} \quad 8 \times 2 = 16 \text{ min}$$

3 Evaluate Does the result make sense?

Matthew has been collecting quarters in a jar. He has **176 quarters**. What is the value of the coins in his jar?

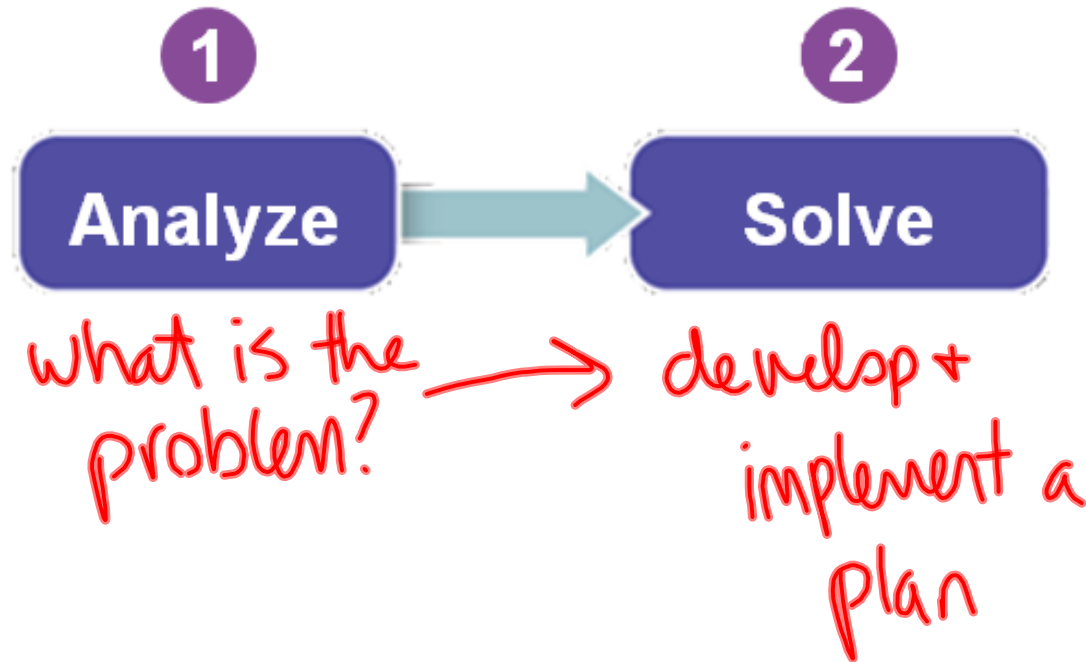

$$176 \times .25 = 44$$

$$176 \div 4 = 44$$

$$\rightarrow 4q \rightarrow 1d$$

$$1q \rightarrow .25$$

Solving Nonnumeric Problems

Scheduling Classes

Manny needs to schedule his classes for next year. The school day is divided into seven periods, and he must take Algebra II, Art, Chemistry, English, History, and Physical Education. Using the information from the course catalog, find a way for Manny to schedule all his classes.

- ✓ Algebra II is offered during either 1st or 2nd period.
- ✓ Art is offered during 2nd period only.
- ✓ Chemistry is offered during either 3rd or 6th period.
- ✓ English is offered during either 6th or 7th period.
- ✓ History is offered during either 4th or 7th period.
- ✓ Physical Education is offered during 4th period only.
- ✓ Lunch is scheduled for 5th period.

1 Analyze Identify the relevant concepts.

- Manny must take lunch during 5th period.
- Art is only available during 2nd period.
- Physical Education is only available during 4th period.

2 Solve Apply the concepts to this problem. Place lunch, Art, and Physical Education into Manny's schedule.

| Manny's Schedule | |
|------------------|-------|
| 1st period | Alg |
| 2nd period | Art |
| 3rd period | Chem |
| 4th period | P.E. |
| 5th period | Lunch |
| 6th period | Eng |
| 7th period | Hist |

2 Solve Apply the concepts to this problem. Place lunch, Art, and Physical Education into Manny's schedule.

Fill the remainder of the classes into Manny's schedule.

| Manny's Schedule | |
|------------------|-------|
| 1st period | |
| 2nd period | Art |
| 3rd period | |
| 4th period | P.E. |
| 5th period | Lunch |
| 6th period | |
| 7th period | |

Effective problem solving always involves developing a plan and then implementing that plan.

The steps for solving a numeric word problem are analyze, calculate, and evaluate.

The steps for solving a nonnumeric problem are analyze and solve.
