

Humanities Disposition Study

Fall 2019

Author: Joseph F. van Gaalen, Ph.D., Asst. VP, IR, Assessment & Effectiveness

Beginning fall 2016 the Humanities Department included a series of disposition questions at the end of the pre- and post-tests designed to measure student point of view on varying topics associated with the course. All of the questions are ordinal in nature with response options of “Strongly Agree”, “Agree”, “Neutral”, “Disagree”, and “Strongly Disagree”, and are aligned with other courses within the discipline (e.g., HUM 2211 and HUM 2250). Further, some disposition questions align with other courses within the Humanities Department. This report will focus on cross-discipline comparisons of disposition questions.

The Humanities courses undergoing assessment for fall 2018, ARH 1000, HUM 2020, 2211, 2235, 2250, MUL 1010, PHI 2010, 2600, and REL 2300, included common questions that overlap in some areas. Table 1 below lists each disposition prompt (and associated learning outcome) along with which courses include that question.

Q19	I don't believe knowledge is only valuable if it improves my grade.						X			X

Table 1. Organization of disposition questions by course.

Table 2 below lists each disposition prompt (and associated learning outcome), and the “Positive response” change (e.g., increase/decrease in “Agree” or “Strongly Agree”). Of the 98 disposition offerings over all courses 46% of dispositions exhibit a 5% positive response increase or higher compared with 44% in fall 2018, 32% in 2017, and 21% in 2016. Question 13 exhibits the most positive change with 9 of 9 courses exhibiting positive increases and 6 of those 9 at or above 5%. Question 1 exhibits the most negative change with 3 of 5 courses exhibiting a negative increase and 1 of those 5 at or above 5%.
