**Program Description**: This program provides instruction in veterinary technology management and professional development. Emphasis will be on the role, purpose, and forms of veterinary technology, basic employability skills and interviewing techniques for career development. Upon completion of this program, the graduate will be eligible to take the registry examination for AVMA certification.

#### Similar programs at other Florida community colleges/state universities:

- 1. Hillsborough Community College AS, ASS
- 2. Miami Dade College AS
- 3. St. Petersburg College AS and BAS
- 4. Brevard Community College AS
- 5. Santa Fe (in partnership with St. Petersburg College)

#### Describe the process by which the need for the new program was identified:

The impetus for the exploration of a Veterinary Technology Associate in Science Degree at Edison State College initially arose in December 2008.

To gather insights on the viability of a veterinary technology program, we:

- Analyzed the process and requirements of accreditation by the American Veterinary Medicine Association.
- Analyzed curriculum models for Vet Tech programs nationwide
- Spoke with Veterinary Technology program director Wendi Ford at Truckee Meadows Community College, Redfield Campus (Reno) and arranged to visit the site on March 13, 2009.
- Spoke with Dean Gerald L. Demoss at Morehead University in Kentucky about the construction of a Vet Tech facility underway there.
- Met with CVT Samantha Stock, education coordinator at Audubon Center for Birds of Prey in Maitland, toured the facility and obtained the Internship Handbook used for Vet Tech interns from Brevard Community College.

- Met with Santa Fe Teaching Zoo Director Jack A. Brown and 25+ students on site. Toured the facility.
- Met with Dr. Richard Flora, dean of Veterinary Technology programs at St. Petersburg College. Toured the facility. Obtained plans for a new building, articulation agreements with high schools, and a partnership program agreement with Valencia Community College.
- Spoke with possible supporters of a Vet Tech program, including
  - 1. Chad Allison, Florida Fish and Wildlife Commission
  - Gary Lytton, Environmental Administrator, Rookery Bay National Estuarine Research Reserve & Florida Department of Environmental Protection
  - 3. Brenda Brooks, Executive Director, Corkscrew Regional Ecosystem Watershed
  - 4. Dr. Matthew Gatof, President, Caloosa Veterinary Medical Society
- Spoke with Dean Glen F. Hoffsis at the University of Florida about possible shared resources and collaborations with the University of Florida College of Veterinary Medicine.
- Arranged to address the Caloosa Veterinary Society at its quarterly meeting March 29, 2009.

According to the latest statistics available from the American Veterinary Medicine Association, there are 150 accredited Veterinary Technology programs in the country, with 18 of these offering 4-year degrees. Nine, including St. Petersburg College, offer distance learning programs.

Florida's DOE Curriculum Framework defines veterinary technicians and veterinary technologists as animal caretakers trained to assist veterinarians in the medical care of animals. The program should meet the requirements of the Committee on Veterinary Technician Education and Activities (CVTEA).

The content includes, but is not limited to, animal office procedure; animal pharmacy and pharmacology; animal examination room/area; animal surgical preparation and assisting; large and small animal nursing; laboratory animal procedures; animal radiology, and employability skills. The curriculum covers computer literacy, applied mathematics, biological science, communications, microbiology, and liberal arts.

Applicants for the certification examination given by the Florida Veterinary Medical Association must be graduates of approved two-year programs. Program approval is defined as being approved by the Committee on Veterinary Technician Education and Activities (CVTEA). In addition to standard accreditation requirements, the American Veterinary Medicine Association requires the following program-specific conditions:

- The dean or academic officer of the program must be a veterinarian.
- There must be sufficient administrative staff.

- Clinical services, field services and teaching hospitals must function as instructional resources.
- All aspects of the physical facilities must provide an appropriate learning environment.
- The program must maintain or be formally affiliated with a full-service acceptable teaching hospital(s) for the welfare and treatment of animals.
- Facilities for the housing of animals used for teaching and research shall be sufficient in number, properly constructed, and maintained in a manner consistent with accepted animal welfare standards. Adequate teaching, laboratory, research, and clinical equipment must be available for examination, diagnosis, and treatment of all animals used by the college. Safety of personnel and animals must be assured.
- Normal and diseased animals of various domestic and exotic species must be available for instructional purposes, either as clinical patients or provided by the institution.
- Experience can include exposure to clinical education at off-campus sites, provided the college has direct responsibility for carefully planning, closely supervising, and regularly monitoring such clinical experiences.
- Medical records must be comprehensive and maintained in an effective retrieval system to efficiently support the teaching, research, and service programs of the college.

Laboratory activities include diagnostic techniques and methods utilized in hematology, blood coagulation, blood chemistry, liver-kidney-pancreatic function tests, body fluid examinations and parasitology.

The required curriculum compliments health programs currently offered at Edison State. The College could capitalize on existing laboratory equipment used for radiography, clinical pathology, microbiology, diagnostic imaging and computer applications for health technicians.

The degree prepares students for a broad array of employment opportunities in large and small animal care, and lends itself to ancillary occupational training in equine breeding and physical therapy, wildlife research and/or rehabilitation, marine mammal and avian research, care and handling of laboratory animals and animal husbandry.

# **Project average enrollment for core courses**: 15 students to be admitted annually

Describe how this projection was determined: The Workforce Development Board and local veterinarians, including the Caloosa Veterinary Medical Association, have been contacted to survey the expected need in the community. The prerequisite courses are similar to other healthcare programs. There may be many students interested in Veterinary Technology as a healthcare career choice. The need in the nation is expected to increase over the next ten years.

List personnel resources required for implementation in addition to existing resources. Indicate in the box the number of each type of position required: Faculty position(s) 1 full time 6 adjunct Must have Masters or higher Staff position(s) None (list title) full time part time full time part time

**Total annual expenses** for new positions: \$60,000

List annual amount required for educational materials/supplies or other operating expenses for implementation: \$17,650.

Identify the funding source to be used for personnel and operating expenses: Tuition and FTE. Possible special appropriation to fund signature program at the La Belle Center.

## JUSTIFICATION FOR CURRICULUM ACTION, OTHER EXPLANATORY INFORMATION:

### **TERM IN WHICH PROPOSED ACTION WILL TAKE EFFECT:** Fall 2010 For any term other than fall of the academic year following submission, approval of the Vice President of Academic and Student Affairs is required.)

(Vice President of Student and Academic Affairs signature)

LEARNING OUTCOMES ASSOCIATE: \_\_\_\_\_ DATE: \_\_\_\_\_

DEPARTMENT CHAIR ENDORSEMENT: \_\_\_\_\_ DATE: \_\_\_\_\_

ACADEMIC DEAN'S ENDORSEMENT: \_\_\_\_\_ DATE: \_\_\_\_\_

After review and signing this proposal, the DEPARTMENT CHAIR will forward the proposal to the DISTRICT DEAN for final signature. The DISTRICT DEAN will then return the proposal to the DEPARTMENT CHAIR.

| DISTRICT DEAN'S ENDORSEMENT: | DATE: |
|------------------------------|-------|
|------------------------------|-------|

The DEPARTMENT CHAIR will process the proposal into a continuous document with any other proposals from his/her department being submitted for review by the Curriculum Committee and forward the document to the CURRICULUM COMMITTEE CHAIRPERSON by the Friday before the next scheduled Curriculum Committee meeting.

NOTE: All new courses that are part of a new degree program must be approved separately and individually using the New Course Proposal Form. This proposal must be accompanied by the New Course Proposal Form for each new core and elective course that comprise the degree program along with a common course syllabus for each course.
